Maintaining the editorial standards of a scientific journal is an important responsibility, because the publications of a society are one of its major services to its members. Maintaining such standards is the ultimate responsibility of the journal editors, and this task can only be accomplished with the advice of associate and consulting editors and a large number of colleagues who are invited to review manuscripts. Their critical comments and helpful suggestions have played a major part in making the Journal of Natural Resources and Life Sciences Education a success. The members of the JNRLSE Editorial Board want to express their appreciation to the following individuals who helped review manuscripts during 2004. This list might not be complete due to problems in collating such information from many sources. We extend our apologies to those reviewers whose names have not been included.
