The Dellavalle Scholarship awards $5,000 to a California high school senior who plans to major in a soil science related field.

Consider a Soil Science Career:

- conduct research in public/private institutions
- manage soils for crop production, forest products and erosion control management
- teach in colleges and universities
- predict the effect of land management practices on natural resources
- design hydrologic plans in suburban areas
- evaluate nutrient and water availability
- manage soils for landscape design, mine reclamation, and site restoration
- regulate the use of land and soil resources

Apply by April 15, 2024
